

BEAMA's Net Zero Service

Reducing emissions together

[When considering Net Zero] many businesses in the UK will need to fundamentally change their operations, their business models, their approach to climate risk assessment and planning, and their relationships with investors and consumers.

[The Committee on Climate Change, 2020](#)

Building a corporate toolkit for the commercial application of operational and product decarbonisation and ensuring industry has what it needs to achieve this: collaboration, best practice and clear government policy.

Industrial Decarbonisation

Scope 1, Scope 2 and Scope 3 emissions, including calculation, reduction and direct policy.

Market Application

Market sustainability and emissions regulations and requirements, including green claims.

Technical Sustainability Standards

National, European and international sustainability standards.

Product Decarbonisation

The circular economy including material efficiency, reparability and durability.

Updates and Trends

Covering the market, industry and political sectors, including research.

The Net Zero Service will be managed by two dedicated members of staff to ensure you have a touch point in industry to relay questions or concerns.

Amy Collins

Head of Net Zero and Clean Tech

To be hired

Sustainability Executive

We are planning a Net Zero Service launch in May 2024 - and you're invited.

BEAMA's Net Zero Service launch.

In May, we will be officially launching our Net Zero Service, which will give further details on the official workplan and engagement opportunities, as well as launch new material to kick start the Corporate Toolkit.

Invites to follow in the new year.

We are currently in the process of lining up guest speakers and confirming the location of the venue. We expect the event will be in central London and feature speakers from the BEAMA membership and separate entities.

Networking opportunities.

We are designing this to be a large event, offering networking opportunities for all members. We are also looking to host a separate CEO conference at the same venue, also with a range of high-level speakers.

Launching 2024...

Net Zero Corporate Toolkit by March 2026

- | | | | | | |
|---|---|--|--|--|--|
|  | <p>01 Corporate Sustainability Reporting Directive
Reviewing who needs to comply and what information is needed with tips for digestion.</p> |  | <p>02 Embodied Carbon
An understanding of definitions, requirements, standards and calculation methods.</p> |  | <p>03 Scope 1, Scope 2 & Scope 3 Emissions
Explanations of what they are and why they are key to future business, including FAQs.</p> |
|  | <p>04 Climate Commitments & Science-Based Targets
Summarising the importance, requirements and process to set a climate commitment.</p> |  | <p>05 Offsetting
Looking at credible offsetting backed by standards to reduce greenwashing risk.</p> |  | <p>06 Transition Plans and Green Finance
Reviewing how to structure a transition plan and how you might finance the actions.</p> |
|  | <p>07 Sustainability Reporting
Understanding current/future UK and EU sustainability reporting requirements.</p> |  | <p>08 Scope 3 Emissions (cont.)
Looking at Scope 3 emissions in more detail, including reducing them within products.</p> |  | <p>09 Net Zero Training and Bitesize Information
Creating understandable sustainability training to support member employees.</p> |

Net Zero Hub

Our members are at the heart of the transition to Net Zero and BEAMA aims to support this journey.

We support members to set and deliver climate and sustainability strategies (in line with a science-based approach to Net Zero) and guide their businesses within transitioning markets.

Every employee of each BEAMA member can have access to our Net Zero Hub. All you need is a BEAMA member login.

Summary

Launching the Net Zero Service with four new Corporate Toolkit areas and the creation of a new Technical Sustainability Committee, with scope for further taskforces as required by members.

Topics:

- Climate Change for Business.
- Scope 1, Scope 2 and Scope 3 Emissions.
- Climate Commitments and Science-Based Targets.
- Offsetting.
- Transition Plans and Green Finance.

Four toolkit pages

As a first post or call for information, including case studies, shared learning, blogs and FAQs.

One report

On the impact and opportunity of climate change for businesses and why early action is key.

Twelve downloads

Covering standards and guides to navigate each topic, including shared learning and third parties.

Four events

Covering both hybrid and in-person only options, to be held in locations such as London and Birmingham.

Six webinars

With presenter opportunities for members and the inclusion of third parties.

Four podcasts

To facilitate shared learning and give a voice to members

Five videos

Offering visual content as an alternative to reading text.
